

Double Swim Diaper Policy

Effective September 1st, 2016

Prevention is BETTER for all of us.

- Every child age 3 and under and those NOT COMPLETELY POTTY TRAINED must wear a **Y APPROVED NON-DISPOSABLE** swim diaper over their disposable swim diapers.
- According to the CDC no swim diaper holds fecal material beyond 3-5 minutes. By double diapering we hope to get the full 5 minutes.
- Please make sure your child visits the bathroom before the lesson starts, even if they went at home.
- If you observe your child doing the “potty dance”, please come into the pool area, take your child out of class and to the bathroom. Some children are reluctant to tell the teacher if they have to go. If your child is not feeling well- has cramps, diarrhea, “sick tummy”, do not come to class.

Please understand that most fecal accidents result in automatic pool closing for a minimum of eight (8) hours. Pool closings are disruptive and affect other aquatic participants and programs. In some cases parents drive long distances and go through considerable effort to get to these programs. We do not want to disappoint anyone for a problem that can often be prevented.

Y approved non-disposable RESUABLE diapers can be purchased at the front desk for \$12.
